Product Description:

Seaboard Fibred Roof and Foundation Coating is designed for ASTM D4479 Type I specification. This material is an asphalt cutback and is fortified with fibers and additives.

Basic Uses:

Seaboard Fibred Roof and Foundation Coating is used as a cold applied system on commercial and residential applications. This material is used as a protective coating for various roof types and for restoring old roofs. It can also be used for dampproofing and a protective coating for concrete, masonry, block walls, metal tanks, and concrete pipe.

Storage and Limitations:

- Do not heat container.
- Protect metal container from weathering due to exposure.

Application:

Seaboard Fibred Roof and Foundation Coating must be applied to a dry surface free of foreign matter. This material can be applied with a roof brush, squeegee, or heavy duty commercial spray equipment and must be stirred before use. This product can be used year round.

Coverage:

The coverage will vary per gallon on concrete or metal from 80-100 square feet to brick and mortar from 50-75 square feet to gravel or flat roofs from 25-50 square feet.

Composition and Safety:

For complete safety information please review the Safety Data Sheet for this product.

Revision Date: 01/2016
